Representative Director,
President and CEO

Our History

We are a furniture parts manufacturer that was founded in Tokyo back in 1945. Initially, we began as a small family business with a small office. For more than 70 years we have supplied high quality and highly functional products. Having earned the trust of customers, today, we maintain business relationships with more than 1,000 companies, including major international furniture manufacturers such as Okamura Corporation and Kokuyo Co.,Ltd. not to mention medical equipment manufacturers and metal trading companies.

In 1960, we created the product brand PLA-PART and later registered it as a trademark.

This brand name is given to the highly functional parts we develop. After a half a century in the business, the name PLA-PART has now become widely known not only as our product line, but as a general term in Japan associated with high end, highly functional parts for chair and desk legs.

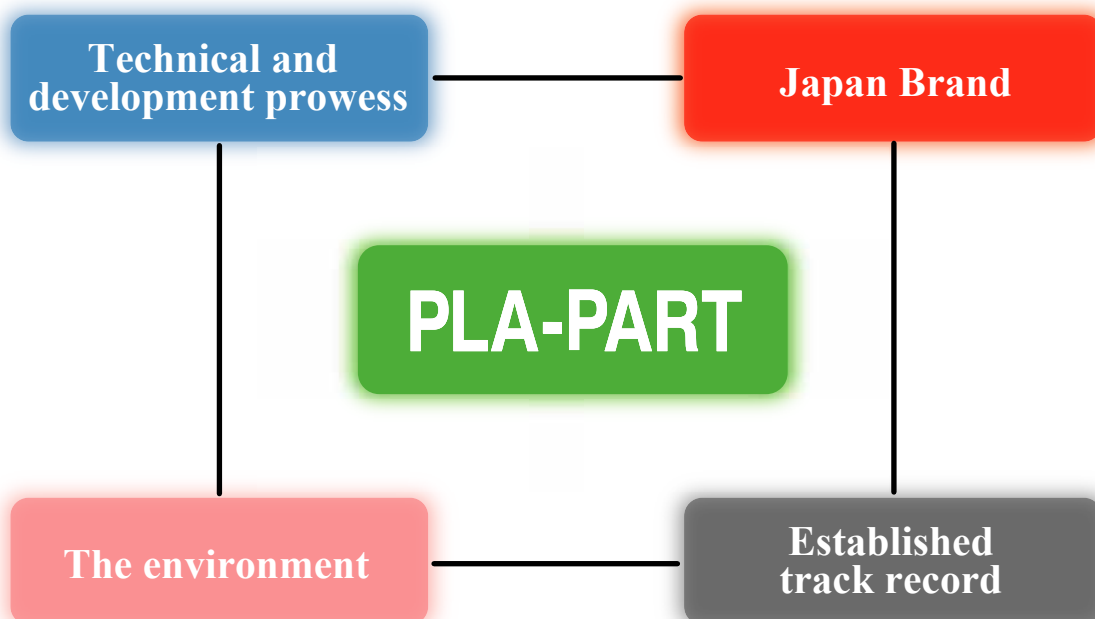

PLA-PART is now an established brand and a source of pride.

Our Products

We are a parts manufacturer focused mainly on functional parts for furniture.

Level adjusters, PLA-PART for wooden furniture glides, plastic window shutters, casters, highly functional power outlets, PLA-PART of furniture feet

PLA-PART is our registered trademark. We have applied for trademark rights in 29 countries around the world.

Technical and development prowess

- We guarantee that we supply highly functional furniture parts. Over the years, we have developed highly functional furniture parts with an added sense of creativity.
- We use the latest in three dimensional CAD and CAM to conduct fast-paced development.
- We dedicate over 5% of net sales to research and development, and we have obtained countless patents and utility models.
- We have developed and supply more than 1,000 customized parts based on specific customer needs.

Japan Brand

- We employ a Japanese style quality control system that strives for perfection. We have countless testing facilities and inspection equipment that we developed in-house, and we collect and analyze data to ensure we always supply products with the best quality in the world.
- For the parts and materials we procure, a dedicated team regularly visits factories to make sure that ISO and/or other quality standards are met.

The environment

- Our products are fully compliant with RoHS and other regulations as part of our commitment to build a sustainable world.
- In the development stage, we also strive to develop products that are recyclable and try our best to eliminate the use of hazardous substances that could harm people or the environment.

Established track record

- We have long-standing business relationships with more than 1,000 companies, including some of the largest office furniture manufacturers in the world.
- Our PLA-PART brand is synonymous within Japan's office furniture industry for high quality and highly functional furniture parts.
